Postdoctoral fellowship

The High Energy Theory Group at the Department of Theoretical Physics of the University of Zaragoza invites applications for one postdoctoral fellowship in any of the areas of interest of the group (Cosmology and axion physics, lattice gauge theory, physics beyond the standard model, beyond relativistic field theories, quantum gravity phenomenology). The permanent members of the group are C. Asensio, M. Asorey, V. Azcoiti, J.M. Carmona, I. Cavero, J.L. Cortes, F. Falceto, E. Follana, J.V. Garcia-Esteve, S. Peñaranda and J. Redondo.

The appointment is for two years and the starting date is flexible (from as early as march 2020, up to the fall 2020.)

Applicants are expected to have a PhD in physics and a strong research record. To ensure full consideration applications should arrive before the 20 December 2019, although later applications will be considered until the position is filled. Applications, including CV, list of publications and a statement of current and future research interests should be sent by email to: postdoczgz@gmail.com

Applicants should also arrange for at least two letters of recommendation to be sent directly to the above email address.
